

Policy Conflict Blog Data Packet

Data-only packet from POLICY_CONFLICT_BLOG_OUTLINE.md.

3. Synthetic Abstraction

Family	Results
trade_size	XOR 0.9948 / 1.0000; strategy holdout 1.0000 / 1.0000; settings holdout 0.9948 / 1.0000; strict combined 0.990 / 1.000 at L40
risk_preference	XOR 0.9635 / 0.9766; strategy holdout 0.9844 / 0.9937; settings holdout 0.9740 / 0.9839; strict both-axes 0.8854 / 0.9119
diversification_preference	aligned behavior 1.0000; conflict behavior 0.8542; XOR 0.9896 / 0.9995; strategy holdout 1.0000 / 1.0000; settings holdout 0.9792 / 0.9957; strict both-axes 0.8333 / 0.8819

Family-within AUROC by layer

Strict family AUROC by layer

Strict asset-family AUROC by layer

4. Clean-Setting Result

Pair		L36 same-capture cosine	
risk_preference vs trade_size		0.6449	
diversification_preference vs risk_preference		0.4684	
diversification_preference vs trade_size		0.4883	

Layer	div_vs_risk	div_vs_size	risk_vs_size
28	0.4666	0.4204	0.5802
36	0.4684	0.4883	0.6449
40	0.3886	0.4638	0.5239

Shared-axis distributions

5. Optional: Joint Prompt Result

Readout	Balanced accuracy / AUROC
size_conflict_present	0.9414 / 0.9862
risk_conflict_present	0.9388 / 0.9871
any_conflict_present	0.9306 / 0.9503
double_conflict_present	0.8898 / 0.9687

Multiple conflict readouts stay strong in the same forward pass

Phase 11 Joint-Prompt AUROC By Layer

Phase 11 joint prompt AUROC by layer

7. Bridge Program

Dataset	Table	Rows	Aligned	Conflict
Stage 1a template control	dx_terminal_trade_size_stage1a_template_control_v1	768	384	384
Stage 1b loose adapter	dx_terminal_trade_size_stage1b_adapter_loose_v1	258	168	90
Stage 1b strict adapter	dx_terminal_trade_size_stage1b_adapter_strict_v1	118	81	37
Stage 1b strict buy-only	dx_terminal_trade_size_stage1b_adapter_strict_buy_only_v1	33	27	6

Stage 1b Loose Adapter Counts

Complaint type	Aligned	Conflict	Root cause	Aligned	Conflict
GENERAL_PERFORMANCE	59	29	RULE_FABRICATION	44	25
NOT_TRADING	30	18	USER_CONFIG_CONFLICT	43	20
STRATEGY_IGNORED	21	11	USER_EXPECTATION_MISMATCH	32	22
UNWANTED_BUY	15	7	CORRECT_BEHAVIOR	21	9
CONFUSION	13	11	PROMPT_FAILURE	11	7
UNWANTED_SELL	12	10	STRATEGY_SLIDER_LOCKOUT	8	2
FEATURE_EXPECTATION	8	0	OVERTRADING	5	0
OVERTRADING	4	0	MARKET_LEGITIMATE	4	5
WRONG_SIZE	4	3			
HOLDING_VIOLATION	2	1			

Stage 1b Strict Adapter Counts

Complaint type	Aligned	Conflict	Root cause	Aligned	Conflict
GENERAL_PERFORMANCE	21	9	RULE_FABRICATION	22	7
NOT_TRADING	16	7	USER_CONFIG_CONFLICT	21	11
STRATEGY_IGNORED	11	3	USER_EXPECTATION_MISMATCH	17	11
UNWANTED_BUY	9	4	CORRECT_BEHAVIOR	8	5
UNWANTED_SELL	6	5	PROMPT_FAILURE	7	1
FEATURE_EXPECTATION	6	0	OVERTRADING	2	0
CONFUSION	5	5	MARKET_LEGITIMATE	2	1
OVERTRADING	3	0	STRATEGY_SLIDER_LOCKOUT	2	1
WRONG_SIZE	3	3			
HOLDING_VIOLATION	1	1			

8. Phase 13 Real Signal Discovery

Direction	Anchor	Complaint	Structure control	Anchor-control	Complaint-control
trade_size	4.425	3.803	3.278	+1.147	+0.526
shared_mean	3.462	3.137	2.760	+0.703	+0.377

9. Row Reading / Ontology Correction

Direction	Top-25	Bottom-25
trade_size: root cause USER_CONFIG_CONFLICT	17/25	20/25

Direction	Top action/size	Top strategy ignored	Bottom action/size	Bottom strategy ignored
trade_size	20/25	5/25	15/25	10/25
shared_mean	20/25	5/25	9/25	16/25

Top trade_size complaint type	Count
UNWANTED_BUY	10/25
UNWANTED_SELL	6/25
WRONG_SIZE	4/25
Concrete action/size combined	20/25

10. What The Probe Seems To Read

Bucket	Examples / counts
High projection examples	“why did you buy HOTDOGZ?”; “why did you buy so much POOPCOIN?”; “Buy available balance 30%, not 10 ETH”; “Quit buying tokens. Liquidate...”; “You are under allocated to POOPCOIN”
No active strategy visible	complaint: “why didn’t you lock in some gains when i asked you to?”; prompt: No active strategies.; decision: sells HOTDOGZ 100%
Agent already taking requested action	complaint: “why you not buying AIGF as I said?”; active strategy: allocate all available ETH to AIGF; decision: buys AIGF 100%
Multi-step execution	complaint wants HOLE; strategy: sell POOPCOIN first, then deploy into HOLE; decision: sells POOPCOIN
Strategy/rule interpretation	“sell every time you have a profit”; “why is strategy 30 minutes, not 30 seconds”; “you bought higher than my entry”
Partial execution	complaint: “SELL IT FULL”; decision: sells 50%
